Some extra information for you:

All of the above are suggested ideas only... There looks like there is a lot of content above, please ONLY try to do what you can. If you set aside an hour or two most weekdays with no distractions, you will manage to get some good work done. I know it's not ideal and we would all prefer to be face to face in the classroom like normal, but at the moment it is not possible.

1. Mental Maths: Continue with the next week of mental maths for the week ahead. I will try to organise the answers for you by next week as they are not available to me online at the moment.
2. SESE: Unlocking SESE: Chapter 13 read chapter 13 Malawi. If you like you can do some investigation on this country for yourself. No need to do any written activities on this chapter.
3. Religion (if applicable): Theme 10, confirmation Lesson 1 The power of the Holy Spirit. This can be found online in the GROW IN LOVE book when you google it, it is available online. Continue to say your daily prayers as you would if we were in school especially remembering everyone working hard during these times to keep us safe and for everyone affected by the virus.
4. Lastly, I attach the answer book for planet maths which will help you to self-correct the maths activities when you have them completed and see if you are going wrong with any part.
